THE APEX EXPERIENCE

IN AN AGE OF MASS-PRODUCED, FACTORY-MADE SHOTGUN AMMUNITION, THE HUNTING ENTHUSIASTS AT APEX AMMUNITION WANTED TO BRING BACK AN EXPERIENCE PRETTY MUCH LONG GONE FOR COMMERCIALLY AVAILABLE ROUNDS. WE TAKE OUR TIME TO DO THINGS RIGHT, TO OBSESS OVER ACCURACY, PRECISION, AND MOST OF ALL, QUALITY, TO CRAFT OUR TUNGSTEN SUPER SHOT LOADS BY HAND, ONE AT A TIME. WE DO WHAT WE DO, EVERY DAY OF THE WEEK, WITHOUT COMPROMISE, FOR YOU, LIKE-MINDED HUNTING AFICIONADOS WHO ALWAYS STRIVE FOR THE ULTIMATE HUNTING EXPERIENCES, USING ONLY THE FINEST HUNTING TOOLS POSSIBLE. IT'S TIME TO EXPERIENCE THE WORLD OF APEX AMMUNITION.

THE TSS DIFFERENCE

APEX Ammunition pioneered the commercial use of ultra-high-density 18.1 g/cc Tungsten Super Shot (TSS), to create the hardest hitting, most accurate shot loads in the business. Our TSS makes the difference throughout our comprehensive line of shotshells for Waterfowl, Turkey, Upland Bird, and Predator hunting.

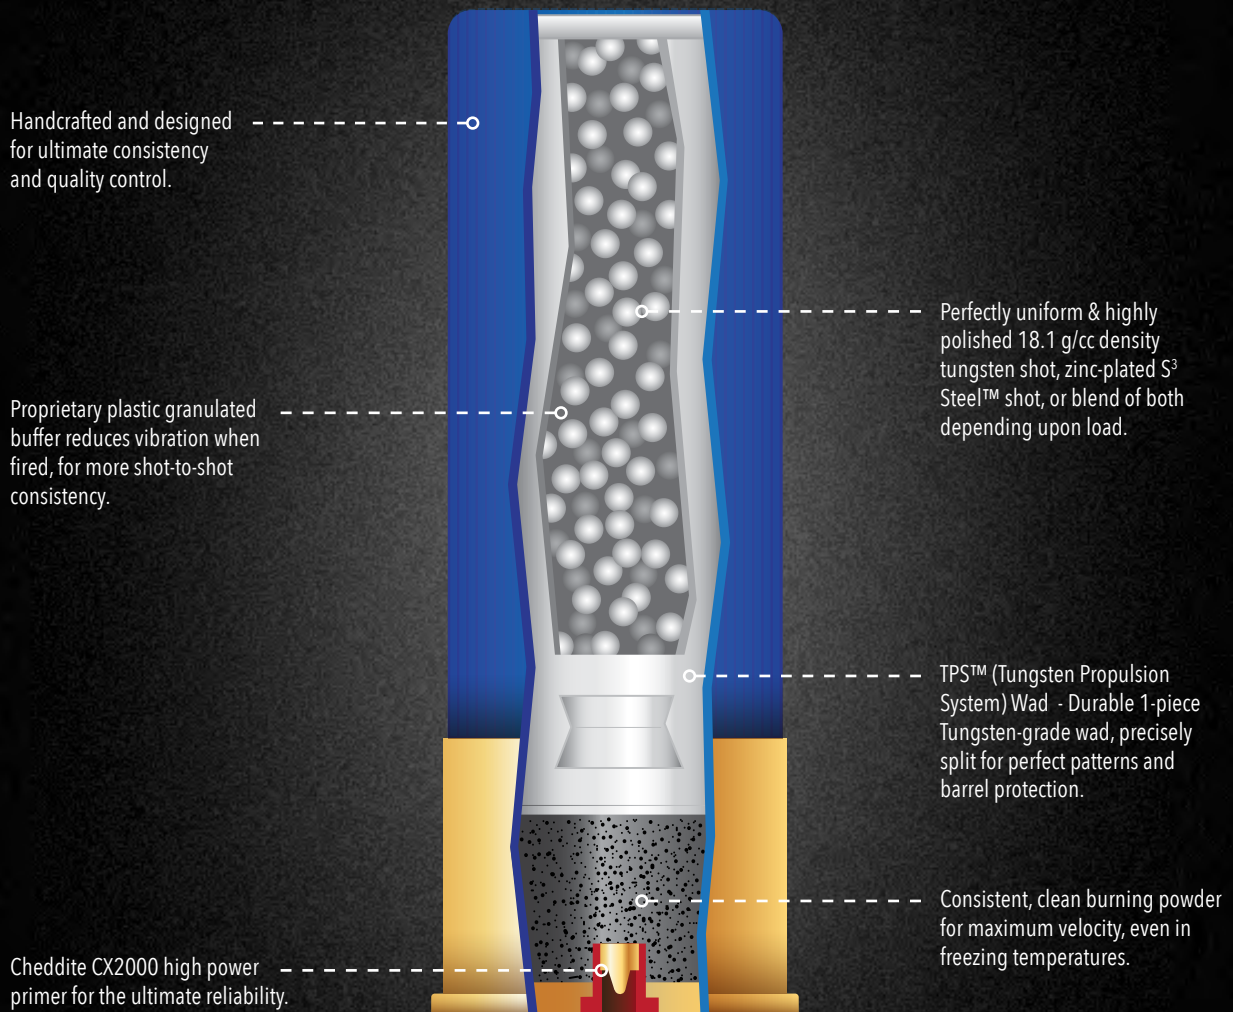

COMPARISON

Pellet	Density
APEX TSS	18.1g/cc
Federal/RSI Heavyweight	15g/cc
Lead	11.34g/cc
Copper	8.8g/cc
Bismuth	9.8g/cc
Hevi-Shot®	9/8-13g/cc

The numbers tell it all! APEX TSS hits the hardest with the most density in a load than most of the wingshooting/seasonal game shells available today. While there are other non-toxic tungsten based options, their densities usually range from 10 to 15 g/cc. The APEX TSS difference is the amount of tungsten in each pellet, 95% to be exact, along with 2.5% nickel and 2.5% iron.

Why Tungsten? The higher the density, the smaller the pellet you can use without sacrificing kinetic energy or momentum. Mass makes up for size, which means more pellets in a payload and more pellets on target. And you know what that means! TSS is also USFWS approved Non-toxic, which opens up more worlds of hunting opportunity to more hunters.

COMPONENTS THAT SET US APART

Our Tungsten grade TPS™ Wad works hard to give you the tightest pattern possible.

First used in our Turkey TSS rounds, and now integral in all APEX rounds from Turkey TSS to S³ Steel™ Waterfowl, our tungsten grade TPS wad made from a soft but durable polymer, is tapered to be thicker on the bottom to provide durability under ignition while minimizing pellet to barrel contact. Our proprietary design puts the shot column farther back into the wad seat so that when it hits the choke, the result is reduced fliers and the tightest pattern possible.

Zinc makes all the difference with our S³ Steel™ Waterfowl rounds.

Unlike other steel shot which is generally loaded with pits and uneven surfaces, zinc plating our steel shot fills the voids and imperfections to create a more consistent and round pellet. Zinc also acts as a lubricant, preventing binding in the loading process, and ensuring more consistent drops. Zinc coating also allows the pellets to move easier against each other under the firing process, requiring less force under setback to keep the shot column tight. That means a more consistent and even shot pattern – a hallmark of all APEX loads.

THE APEX LINEUP

FROM OUR HANDLOADED TSS SHOTSHELLS FOR HUNTING WATERFOWL, TURKEY, UPLAND BIRD AND SEASON PREDATORS, TO OUR HANDCRAFTED TSS/S³ STEEL™ BLENDS, AND OUR STRAIGHT ZINC-PLATED S³ STEEL™ WATERFOWL LOADS, YOU'LL FIND JUST THE RIGHT MATCH TO EXPERIENCE YOUR BEST SHOT EVER.

WATERFOWL

Our Waterfowl lineup delivers the best patterning, hardest hitting non-toxic performance possible. All of our TSS, TSS/S³ STEEL™ BLEND and S³ STEEL™ loads feature our tungsten grade TPS we first used in our TURKEY TSS for unmatched shot-to-shot consistency. From there, it's a matter of how much distance and knockdown power you need for your particular waterfowl hunting experience.

TURKEY

Turkey hunters know that an extra 10 yards can make or break the hunt. APEX 18.1 g/cc density TSS will give you the confidence you need at distance. From 10 gauge to 410, with shot sizes ranging from 7-1/2 to 9-1/2, we've created the new standard against which all shotshell ammunition is measured against. Our Turkey loads also bring a revolutionary new level of performance to sub gauges never experienced before.

UPLAND BIRD

As many states and public lands transition to non-toxic requirements, you need a cartridge that leaves you with zero doubt when you hit the field. Our light, fast and versatile upland round means non-toxic has never hit so hard. From bobwhites in the south to late-season roosters across the great plains, our 18.1 g/cc density TSS means you'll put more birds in hand on every trip.

NOTCH, AND THEY HAVE A
GREAT GROUP OF GUYS
CALLING THE SHOTS.”**

Jake Stanisch

PREDATOR

APEX Predator TSS brings ultra-high density 18/1g/cc TSS to the varmint and big game hunt. Larger pellets plus maximum density equals unmatched knockdown power. This results in extended distances, superior penetration, and extremely tight patterns at all ranges. Available in 12 and 20 gauges in 4, 2, and BB shot sizes.

PRODUCT INDEX

THE APEX STORY

What started in 2017 with a few handmade shells for a hunting trip with buddies has become an obsession to provide wingshooters with the absolute best performing ammunition possible. Founded by U.S. Veterans and hunting enthusiasts in the great state of Mississippi, APEX Ammunition pioneered the commercial application of ultra-high-density Tungsten Super Shot to create the hardest hitting, most accurate shot loads in the business. The driving principle behind our continued quest for innovation and better performance is our commitment to delivering a hunting experience like no other.
